\*\* Divide these values by 2 for bidirectional types.

For bidirectional types, electrical characteristics apply in both directions.

exponential waveform  $t = 20 \mu s$  .....  
 $t = 1 \text{ ms} \text{ ---}$   
 $t = 10 \text{ ms} \text{ ——}$

Note : The curves of the figure 2 are specified for a junction temperature of 25 °C before surge. The given results may be extrapolated for other junction temperatures by using the following formula :  $\Delta V(BR) = \alpha T(V(BR)) \times [T_j - 25] \times V(BR)$   
 For intermediate voltages, extrapolate the given results.
